

Plantcotex Root Extra

Technical information

Composition	Double-sided PE-coated polyester fabric
Surface mass	363 gr/m ²
Thickness at 2 Kpa	0,44 mm
Colour	Black
Mechanical resistance	34 kN/m $\pm$ 4%
Static perforation	4,5 kN/m
Elongation at break	25% before rupture
Filtration opening	100% waterproof up to 70°
Packaging	25 lm rolls
Available widths	80 cm 100 cm 133 cm
Customs made	Made to measure on request (up to 4 m wide)

Product Description :

Root barrier to prevent the random development of plant roots and to protect mineralised areas, pipes and networks. Composition based on woven polyester fabric coated on both sides with 363g/m² PE. Tensile strength 34 kN/m and puncture resistance 4.5 kN. 100% waterproofing up to 70°C.
